PROFESSIONAL SUMMARY

Java Software Developer with hands-on experience in Java, Spring Boot, Spring Data JPA, REST APIs, MySQL, PostgreSQL, MongoDB, Docker, and Git. Contributed to a live backend project at DeliDrive by resolving bugs, optimizing code, and implementing backend enhancements in a production codebase. Seeking an entry-level Java Backend Developer role.

SKILLS

Java, Spring Boot, Spring Data JPA, Hibernate/JPA, REST APIs, MySQL, PostgreSQL, MongoDB, Docker, SQS, LocalStack, JUnit, Git, Postman, Object-Oriented Programming (OOP), SOLID Principles, MVC Architecture, Design Patterns (Factory, Strategy), Data Structures & Algorithms (DSA)

EXPERIENCE

Deli Drive (Java Software Developer) May 2026 - present

- Worked on backend of a live project using Java, Spring Boot, PostgreSQL.
 - Worked on a User platform, worked on notification, product, entitlement, and user service (microservices)
 - Worked on business logic for credit transfer, product, contract, user, notification and entitlement workflow.
 - Debugged REST APIs, analysed application logs, and identified root causes of backend issues.
 - Collaborated with senior developers through code reviews and followed industry standard practices.
 - Performed code optimisation to improve maintainability and application performance.
 - Worked on assigned development tickets, understanding business requirements and deliver them.
 - Integrated application with SQS using LocalStack and minstack for local development and testing.
-

PROJECT (personal)

Product Service (CRUD + DB Integration)

- Designed and implemented RESTful APIs with full CRUD functionality.
 - Integrated MySQL database using Spring Data JPA for persistent storage.
 - Followed layered architecture (Controller, Service, Repository).
 - Tested APIs using Postman.
-

EDUCATION

Scaler Academy - Software Engineering

2025 – 2026 | Online

Java, DSA, Backend Development

Bachelor of Architecture (B.Arch)

2017 – 2022 | Kerala

IES College of Architecture
